VeriSPLINT™

385nm
Fast & Firm

Physical Properties

Physical Properties based on ISO 20795-2

Property	Value
Ultimate Flexural Strength	≥ 100 MPa
Flexural Modulus	≥ 2500 MPa
Maximum Stress Intensity Factor	1.75
Total Fracture Work	596
Sorption	29
Solubility	< 1
Residual Monomer	< 0.10%
Biocompatibility (ISO 10993-1:2009)	Pass

VeriSPLINT™

An FDA 510(k) cleared biocompatible medical device 3D print resin that is designed for the production of precise bite guards, dental splints, and occlusal night guards. While VeriSPLINT™ boasts rapid printing, it also delivers precise, high-quality, and cost-effective splints. Users can now leverage a full build platform to 3D print up to four splints within one hour at a cost of only \$5.00 - \$6.00 per splint.

“When we first started printing occlusal splints we really struggled with finding a solid material that was both durable and reliable. Even when we got them to fit, we’d get calls of fracture within weeks. Whip Mix VeriSPLINT is by far the best we’ve found for hard occlusal splints. Thanks, Whip Mix, for providing yet another dependable resins” *Brandon Stapleton, DMD, MSD/Prosthodontist, iDENTity Dental Studio, Lexington, KY.*
